

Product Information

Materials testing machine Z330E with testControl II

Z600E with hydraulic grips

Advantages and features

Modern load frame design

- The robust load frame with four hard chrome-plated guide columns and a solid base crosshead and moving crosshead offer excellent guidance properties and high degree of machine rigidity.
- The drive features maintenance-free, digitally controlled AC drive technology. This is combined with an innovative motor feedback system, allowing excellent constant speed characteristics to be achieved even at extremely low speeds.
- It is possible to test specimens and components with varying lengths thanks to the large test area, which at the same time features a low overall height.

Optimum operator convenience

- Ergonomics are top priority when it comes to operating the new materials testing machine.
- The machine is adjustable for optimum ergonomic configuration; modular design allows adaptation as and when required.
- The zero-backlash prestressed precision ball-screws with digitally controlled AC servo drive makes operation that is nearly service-free possible.

Drawing: Z600E with hydraulic grips

Innovative electronics

- The new testControl II measurement and control electronics provide the ideal basis for precise, reproducible test results.
- Impressive features include new drive technology, high measured-value acquisition rates, and a modular design (for more information, see page 2).

Satisfying the most demanding safety requirements

- Compliance with the statutory safety requirements of the EC Machinery Directive is ensured in all materials testing machines, while an EC Declaration of Conformity accompanies every machine supplied.
- Only the latest safety technology and proven industrial components are used.
- The highest degree of safety for the operator, test results, specimen material, and testing system are guaranteed.

Future-proof

- Modular design means that the testing system can be re-equipped or upgraded whenever required.
- Moreover, testControl II control electronics are compatible with future-generation Zwick software.
- Even after a product has been discontinued, spare parts remain available for a minimum of 10 years.

Zero-point correction Automatic, at start of measurement	Measurement value sampling rate, internal	400 kHz
	Measurement value transmission rate to PC	500 Hz (optional 2000 Hz)
Measurement signal run-time correction for all channels Yes	Zero-point correction	Automatic, at start of measurement
	Measurement signal run-time correction for all channels	Yes
Interface to PC Ethernet	Interface to PC	Ethernet
Eco mode Yes, automatic switch off of power section (time can be set)	Eco mode	Yes, automatic switch off of power section (time can be set)
CE conformity Yes, according to Machinery Directive 2006/42/EC	CE conformity	Yes, according to Machinery Directive 2006/42/EC
Rated values	Rated values	
Mains frequency 50/60 Hz	Mains frequency	50/60 Hz
Electrical connection 400 V +/- 10 % (3 Ph, N, PE)	Electrical connection	400 V +/- 10 % (3 Ph, N, PE)
Power consumption 6,5 kVA	Power consumption	6,5 kVA

1) A high-quality DCSC measurement module is included in the scope of delivery (occupies one module bus slot).

Description	Item number
Display-equipped remote control for testControl II (with specimen grips control)	1008960
Display-equipped remote control for testControl II (without specimen grips control)	1008955
2,000-Hz measurement value transmission: Increasing the measurement value transmission from 500 Hz to 2000 Hz. The measured values are transmitted and processed to testXpert II.	057860
Table mounting to electronics container with PC support	1004700
Mounting of makroXtens at the rear 90°, can be swiveled 45° at the rear to the left, sensor arm length 300 mm (standard)	1007089
Mounting of makroXtens at the rear 90°, can be swiveled 45° at the rear to the left, sensor arm length 450 mm (when mounting a safety device at the rear)	1007092
Protection for lead screws	Acc. to load frame
