

Z-PC Line

HIGH PERFORMANCE I/O CANOPEN SYSTEM

Z-PC line is a complete line of I/O modules with CANopen standard interface that does not require any couplers, controllers, or repeaters. All modules have an integrated interface with CANopen communication, speeds up to 1 Mbps, and they are ideal for acquisition and control signals for system and machines where the distance between signals plays a key role. Z-PC line CANopen modules can be integrated with third parts configurators and master controllers / network managers, even on board existing machines and installations.

The advantage of not needing a fine line coupler dramatically reduces the cost for small/medium installations.

I/O

I/O MODULES RANGE

I/O Modules for analog input (8), thermocouples and thermoresistance (4/8), digital input/output (16/24), analog output (3), load cells (1) etc.

CPU / INTERFACES

- Web server multi-function controller, datalogger with CAN interfaces, Ethernet,
- RS232/RS485, ModBUS RTU
- CANopen fiber optic / fiber optic repeater

SETTINGS

- IEC 61131 programming system (CoDeSys)
- EASY SETUP suite (plug & play software) by RS232
- DIP switches (address, baud rate)

HIGH PERFORMANCE

- High accuracy: 0,1..0,05%
- Isolation: 1,5Vac (3 way)
- Baud rate: up to 1 Mbps
- Response time for digital channel: 1 ms
- Response time for analog channel: 1 ms
- Power supply up to 8 sensors

APPLICATION NOTE

HANDLING SYSTEM

AUTOMATIC BOTTLING SYSTEM
